Leaves of Absence and Impact on Research

2019/4 - 2019/8	Parental, Centre Hospitalier Affilié Universitaire de Québec. I was on maternity leave and engaged in research activities at a reduced capacity. I continued to maintain my current research studies as principal investigator and co-investigator, advise students, and apply to select funding opportunities. This leave had an impact on my lab's funding and manuscript output.
2015/2 - 2015/3	Parental, University Health Network I took a 2 month maternity leave during my postdoctoral fellowship. I was offered a faculty position at Laval University in November 2014 but had to delay my start date until April 2016 as a result of my pregnancy, the birth of my child, and the completion of an additional 6 months of my postdoctoral fellowship.
